

# DH#002 Assembly Instructions

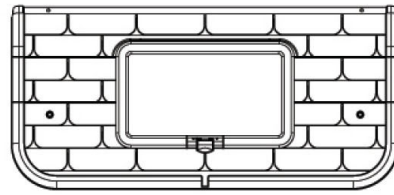

1 x Front Panel

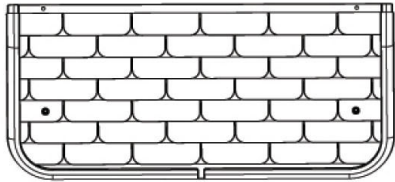

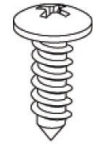

1 x Rear Panel

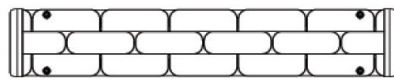

2 x side Panels

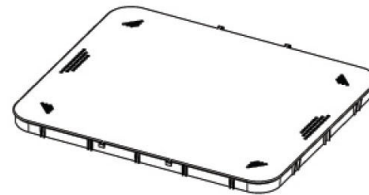

1 x Lower Roof Panel(Vented) 10 x Screws

1 x Lower Roof Panel(Non Vented)

1 x Upper Roof Panel

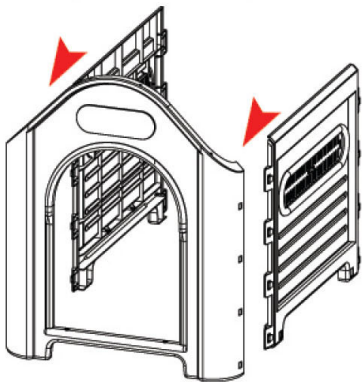

1 x Floor Panel

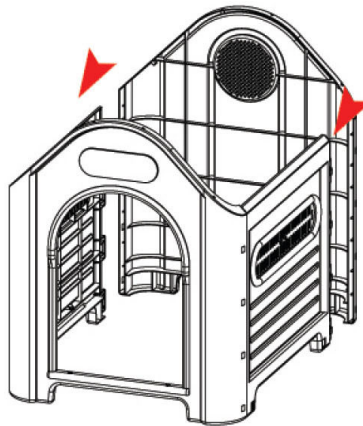

10 x Screw Caps

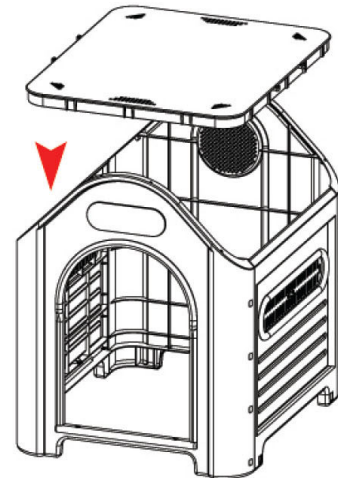

Tools required:Phillips Screwdriver

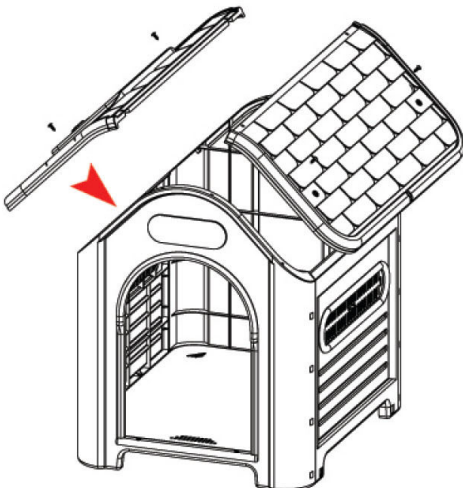

1. Fit the left and right hand side panels to the front panel by inserting the tabbed end of the side panels into the slot on the edge of the front panel.Push the panels together until you hear them snap securely in place.

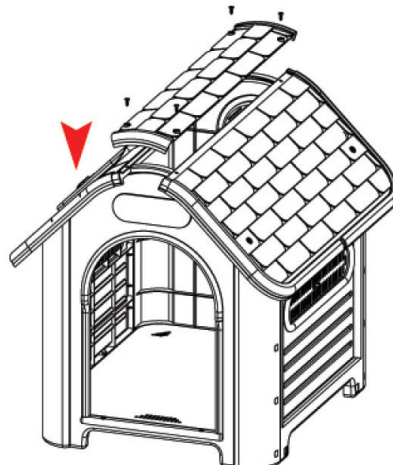

2. Now fit the rear panel by inserting the tabbed ends of the side panels into the slots on either edge of the rear panel. Push the panels together until you hear them snap securely in place.

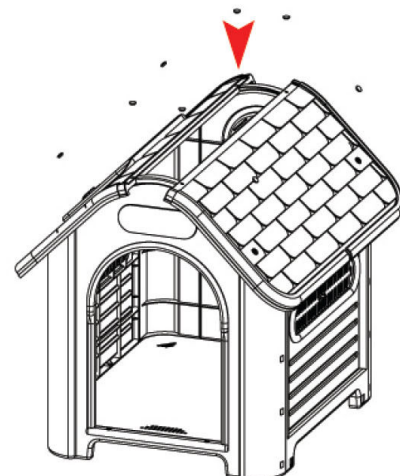

3. Next lower the floor panel through the top of the frame until it slots securely in place at the base of the kennel.

4. Now align the lower roof panels so that the front and rear panels are located in the channels at the edge of each roof panel. Secure the panels in place using 2 x screws per panel.

5. Now locate the upper roof panel and secure in place using 4 x screws.

6. Finally push the 8 x screw caps in place.
