

Composition

Zylkène® 75mg, Alpha-S1 tryptic casein* 75mg
Excipient: sufficient for one capsule
Zylkène® 225mg, Alpha-S1 tryptic casein* 225mg
Excipient: sufficient for one capsule
Zylkène® 450mg, Alpha-S1 tryptic casein* 450mg
Excipient: sufficient for one capsule

Properties: Prolonged periods of stress or stressful situations can lead to behaviour problems which can be associated with feeding irregularities, inappropriate urination or defaecation, reduced exploratory behaviour, fear, reduced play, irritability, changed demeanour or stereotyped behaviour such as licking and pacing.

Zylkène® has been developed to help companion animals overcome stressful periods or situations such as 'home alone', a new environment, new people or new animals, hospitalisation, holidays, lactation, weaning, travelling or whenever the pet's routine is altered.

Zylkène® contains a patented bioactive peptide which has been studied for many years in collaboration with many well known institutes and veterinary surgeons that specialise in behaviour problems.

Usage: Administer to dogs and cats facing daily stress or before any predictable stressful situations. Zylkène® favours rapid and smooth adaptation to changing situations. No side effects have been associated with the use of Zylkène. It can be used for short or extended periods. There are no contraindications to use.

Directions for use: Oral route: Zylkène® is a palatable, water soluble powder contained in a gelatin capsule. The capsule can be given whole, but it is preferable to open the capsule and mix the powder with food or a treat such as cheese or tuna. The average daily intake required is 15mg/kg and should be given once daily. The pet's behaviour should be re-evaluated after a 15-30 day course, perhaps with concurrent behavioural therapy, and the daily intake modified if necessary. The period of use is 1-2 months, repeated according to veterinary advice.

	Zylkène® 75mg	Up to 5kg (11lb)	1 capsule a day
		Between 5 and 10kg (11-22lb)	2 capsules a day
	Zylkène® 225mg	Between 10 and 20kg (22-44lb)	1 capsule a day
	Zylkène® 450mg	Between 20 and 40kg (44-88lb)	1 capsule a day
		Over 40kg (88lb)	2 capsules a day

Storage: Keep out of reach of children. Keep in a cool dry place. Close securely after use.

Nutritional Supplement

*Patented bioactive peptide.
